## WALLPAPER FABRIC

### FIRE CERTIFICATION

ID: 3508 Brushed Textured Wallpaper 330gsm - Paste the wall

| **FIRE PERFORMANCE** | Euro class B s1d0  
Class 0 / 1 BS 476 part 6/7  
M1 NF P 92501 / 92507  
B1 DIN 4102 – 01  
ABP Number: P-MPA-E-04-507  
ASTM Test-Method E84 - 15a |

## BUILDING CODE CITATION FOR THE CLASSIFICATION SCHEME

(1) 2009 edition, NFPA 101 Life Safety Code, para. 10.2.3.4
(2) 2009 edition, NFPA 5000 Building Construction & Safety Code, para. 10.3.2
(3) 2012 edition, International Building Code, para. 803.1.1
ID:3354 Premium Wallpaper 173gsm - Spray the wall
ID:3564 Linen Textured Wallpaper 160gsm - Paste the wall

2.1 GENERAL:
The product MA8009SU150 is defined as a decorative covering intended to be glued on walls and ceiling by means of glue, in accordance with EN 15102 + IN1: 2011.

2.2 DESCRIPTION OF THE PRODUCT:
The product MA8009SU150 is described below or in the test report provided in support of classification listed in 3.1:
Pre-spray glued wall covering, composed of non-woven made from cellulose (45%), terephthalate polyethylene (13%), binder (19%), mineral fillers (17%) and water activated glue (6%).
Nominal surface density: 150 g/m²
Nominal thickness: 0.28 mm
Colours: White

3.1 TEST REPORTS:
NF EN ISO 11925: 2013
NF EN 13823: 2013

</table>
The substrate is a gypsum plaster board (in compliance with EN520) of density 700 ± 100Kg/m³ and thickness 12.5 ± 0.5mm, classified A2-s1-d0 according to EN13501-1 :2007 is previously painted with an acrylic aqueous based priming coat such as "IP Chantier Sous-couche Plaque de Plâtre product from CECIL Professionnel brand" (90 ±30 g/m² dry layer). The prepared substrate is afterwards moistened with 150 ± 50 g/m² of spray water to activate the glue of the wall covering which is applied on the wet surface.

The substrate is a gypsum plaster board (in compliance with EN520) of density 700 ± 100Kg/m³ and thickness 12.5 ± 0.5mm, classified A2-s1-d0 according to EN13501-1 :2007 is previously painted with an acrylic aqueous based priming coat such as "IP Chantier Sous-couche Plaque de Plâtre product from CECIL Professionnel brand" (90 ±30 g/m² dry layer). The prepared substrate is afterwards moistened with 150 ± 50 g/m² of spray water to activate the glue of the wall covering which is applied on the wet surface.

A border to border vertical seal is located on the large wing at 200mm from the corner of the sample. Tests were carried out without air gap between substrate and backing board with cavity closed.

4.1 REFERENCE OF CLASSIFICATION:
This classification has been carried out in accordance with EN 13501-1:2007 + A1: 2009.

4.2 CLASSIFICATION:
The product MA8009SU150 in relation to fire behaviour is classified: B
The additional classification in relation to smoke product is: s 1
The additional classification in relation to flaming droplets / particles is: d 0
The format of the reaction to fire classification for construction products excluding flooring and linear pipe thermal insulation product is:

<table>

CLASSEMENT DE REACTION AU FEU : B – s1– d0

4.3 FIELD OF APPLICATION:
This classification is valid for the following product parameters:
Composition: Pre-spray glued wall covering, composed of non-woven made from cellulose (45%), terephthalate polyethylene (13%), binder (19%), mineral fillers (17%) and water activated glue (6%).
Nominal surface density: 150 g/m²
Nominal thickness: 0.28 mm
Colours: White
This classification is valid for the following end used applications:
Decorative covering glued on walls or roofs, applying the covering on a wet substrate type gypsum plasterboards classified A2 with characteristics 525 kg/m3 and 12± 0.5 mm thickness or all substrate classified A1 or A2 in end used, substrate being painted previously with an acrylic priming coat "IP Chantier Sous-couche Plaque de Plâtre product from CECIL Professionnel brand".
5.1 LIMITATION:

This classification document does not represent type approval or certification of the product. The classification assigned to the product in this report is appropriate to a declaration of conformity by the manufacturer within the context of system 3 attestation of conformity and CE marking under the Construction Products Directive.

The manufacturer has made a declaration, which is held on file. This confirms that the product's design requires no specific processes, procedures, or stages (e.g., no addition of flame retardants, limitation of organic content, or addition of fillers) that are aimed at enhancing the fire performance in order to obtain the classification achieved. As a consequence, the manufacturer has concluded that system 3 attestation is appropriate.

The test laboratory, therefore, played no part in sampling the product for the test, although it holds appropriate references, supplied by the manufacturer, to provide for traceability of the samples tested.
